What Size Shed Do I Need?

1. Getting Started · https://www.shed-solutions.com/docs/getting-started/what-size-shed-do-i-need.html

Sizing by Use

Choosing the right size starts with knowing what you plan to store. Here are general guidelines:

- **4×6 to 6×10** -- Basic yard tool and bin storage
- **8×8 to 10×10** -- Mid-size storage including bikes, lawn equipment, and seasonal items
- **10×12 and up** -- Workshop, multi-purpose, or commercial storage

Measure Before You Decide

We always recommend measuring your largest items -- especially door clearance -- before choosing a size. It's easy to underestimate how quickly a shed fills up. Our team can help you find the right fit during a free consultation.

Standard & Custom Sizes

We offer a wide range of standard sizes and can accommodate custom dimensions. Contact us to discuss a build that fits your specific space and needs.
